***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims drawn to compounds wherein X is O, classified in classes 549, 514, subclass 400+, for example.
- II. Claims drawn to compounds wherein X is S, classified in classes 549, 51, subclass 49+, for example.
- III. Claims drawn to compounds wherein X is CRR, classified in classes 562, 564, 560, 544, subclasses 200, 300, 400+, for example.
- IV. Claims drawn to compounds wherein X is N, classified in classes 540, 544, 514, subclasses 100, 200, 300, 400 +, for example.

The inventions are distinct, each from the other because of the following reasons:

Each group is drawn to a separate class of structurally diverse chemical compounds which are not necessarily obvious variants nor do they possess a significant common core wherein a reference anticipating one would not necessarily render the other obvious, and to search all in a single application would present an undue burden on the examiner.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1626

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
